presents

Preparing Mentors and Advisors at Xavier (P-MAX)

P-MAX is a program that is designed to provide participants with the knowledge and skills needed to mentor and advise undergraduate students, especially those engaged in research. Ultimately, the goal of P-MAX is to assist faculty in developing effective relationships with their mentees. Topics for discussion and exchange of ideas include:

- ⇒ communication
- ⇒ setting goals and expectations
- ⇒ cultural awareness
- ⇒ strategies for identifying and resolving challenges
- ⇒ mentor roles and responsibilities
- ⇒ mentoring philosophy
- ⇒ strategies for facilitating mentoring
- ⇒ case studies to reflect on and put learning into practice

DATE: Saturday, July 22, 2017

TIME: 8:00 AM–4:00 PM

PLACE: Mellon Seminar Room, Library,
Room 532B

To register: cat@xula.edu

Breakfast, lunch and refreshments will be provided.

* BUILD is a National Institutes of Health (NIH) initiative whose purpose is to enhance diversity in the biomedical, behavioral, clinical, and social sciences research workforce. Addressing a major leakage point in the research workforce pipeline, the initiative is intended to support the design and implementation of innovative programs, strategies and approaches to transform undergraduate research training and mentorship.

** Project PATHWAYS is Xavier's BUILD initiative, which consists of several components targeting students, faculty, and several non-academic centers at Xavier.
